WHAT TO DO IF YOU ARE TRAVELLING FROM REGIONS AFFECTED BY THE NEW CORONAVIRUS INFECTION (COVID-19) AND YOU START TO SUFFER FROM FEVER, COUGH OR BREATHLESSNESS?

If you start to suffer from symptoms of a respiration disease (fever, cough, breathlessness) during your journey, please inform the bus crew staff or bus driver who will contact the line 112 if necessary.

If you are at a bus station, do not leave the bus station area and call the line 112 and provide information about your situation.

If you are already at home, do not go anywhere. Avoid contacts with other people. Call your doctor or the line 112. Inform them about your stay in the high-risk area.

Wash your hands often with soap and water. If they are not available, use alcohol-based disinfection means.

If you suffer from cough, cover your mouth and nose with a handkerchief or use your sleeve, not hands! If it is possible, use a face mask.
